

Word Search - Clues

Use these clues and the 'Bee ID & info sheet' to find the right words and then discover them inside the Word Search!

Words can appear in the word search; forwards, backwards horizontally and vertically.

You can discover the answers at www.wiltshirewildlife.org/word-searches

1. Find out the name of a little black and white bee in the Bee ID & info sheet, then search for it in the word search! Jot your answer down here if it helps

2. Find out the name of a little bee that loves ivy flowers in the info sheet, then search for it in the word search! Jot your answer down here if it helps

3. Find out the name of a little bee that has red hair in the info sheet, then search for it in the word search! Jot your answer down here if it helps

4. Find out the name of a bee that patrols its flowers in the info sheet, then search for it in the word search! Jot your answer down here if it helps _____
5. Find out the name of a bee that looks a bit like a small wasp, in the info sheet, then search for it in the word search! Jot your answer down here if it helps

6. Find out the name of a bumblebee that has a very long tongue, in the info sheet, then search for it in the word search! Jot your answer down here if it helps

+ Well done! Now you have learned about some bee species, can you go back to the info sheet and discover some of the 16 different flowers that bees like, that are all in the word search too?

+ Bonus! Can you add to the word search by finding 6 different words relating to bees favourite nesting sites? Use the Bee ID & info sheet again, to help.

6 bee names, 16 plant names and 6 names relating to bee nesting, how many of them did you find?
