What can you see at **Langford Lakes**?

Photo credit: Alan Benson

There are lots of beautiful **birds**.

Can you hear them singing?

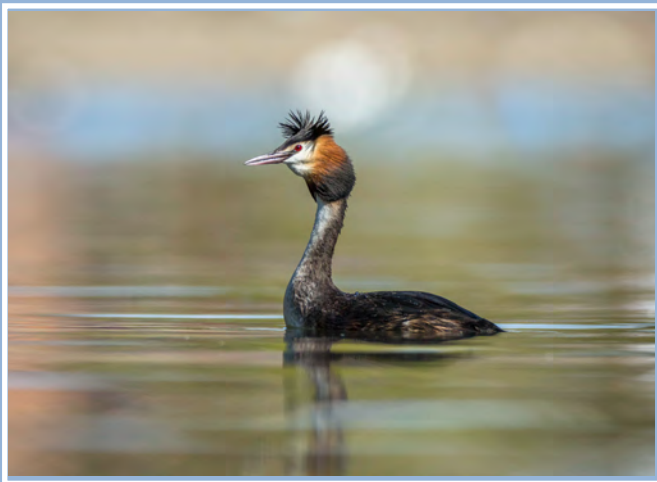

Photo credit: Phillip Male

In spring watch for great-crested grebes shaking their heads in courtship.

How many different wetland birds can you find?

Photo credit: Eleanor Dodson

In summer there are many different kinds of **dragonflies**.

How many different kinds of dragonflies can you find?

Now you know that

1. Langford Lakes is special because there are so many different kinds of birds, **wildfowl and insects**.
2. Langford Lakes provides an important **wetland habitat** for wading birds.
3. We are looking after **Langford Lakes** so that the birds, wildfowl and insects stay here for you to see and enjoy.

We hope you enjoyed your day.
What did you enjoy the most?

Thank you for visiting
Langford Lakes Nature
Reserve.
